### This Website came about for two reasons:

1. First was a keen interest in backyard gardening and greenhouses (and my new found obsession - Aquaponics)
2. Secondly was a fascination with the Internet and how so many people are able to get their ideas out there for people to see.

So this site is in service to the innovative greenhouse gardening ideas, for backyard greenhouses, community gardens, and small backyard nurseries.

**(We are in the Works to allow visitors the ability to post comments, pictures, and videos in order to share what works for you).**

I will admit, off the bat, that I have not tried all of the ideas that are displayed on this site first hand.

However, I haven't posted anything that, after thorough review, I do not believe to be worth while, of interest, or just to be plain entertaining. And I am working my way down the list and am reviewing as I go.

And believe me I have scoured through a lot of Crappy Information to find the gems, or what I believe to be gems, of information offered here.

### The Backyard Ecosystem Top Topics of Interest:

- [Greenhouse Plans](#) - Build your own (Be sure to Join our Newsletter and you can take a look at the .pdf we made of our Hoop House Build - Step by Step with Pictures.

Greenhouses - Do It Yourself Plans, Kits, and Growing information.

- [Hoop House Greenhouses](#), Poly Tunnels or High Tunnels (all the same thing) - we'll show you why we believe Hoop Houses are the best choice for year round food production.

- [Aquaponics](#) - Fish and Vegetables growing together.

- Vermiculture - Worms (Composting on Steroids)

- Chicken Coops and Ducks (The ultimate Greenhouse Pets)

- Insects - They made the list, but possibly not for the reasons you maybe thinking....

- Canning and Food Preserving

- [Backyard Nursery](#) - This is a New one, we received questions on Backyard Nursery - so we put together some of the Better resources. Mike's info is Great!!
