

use	zone	allowed by right	allowed with ZA* permit	allowed by right, but only as accessory to a primary use that is allowed by right or with CUP** (ZA)	Paul's comments
aquaculture	R-1			any size	I don't see why aquaculture and market gardens should be treated differently; and why not allow it as a primary use?
aquaculture	C-2	any size			I don't see why aquaculture and market gardens should be treated differently
aquaculture	M-1	any size			
market garden	R-1	up to 1 acre	over 1 acre		I don't see why aquaculture and market gardens should be treated differently
market garden	C-2	up to 3 acres	over 3 acres		I don't see why aquaculture and market gardens should be treated differently
market garden	M-1	any size			
community garden, private	R-1	up to 1 acre	over 1 acre		private CG's get a nice size boost here over current allowed size
community garden, private	C-2	up to 3 acres	over 3 acres		private CG's get a nice size boost here over current allowed size
community garden, private	M-1	any size			private CG's get a nice size boost here over current allowed size
private garden	R-1			any size	why not primary use?
private garden	C-2			any size	why not primary use?
private garden	M-1			any size	why not primary use?
urban beekeeping	R-1			any size	why not primary use?
urban beekeeping	C-2			any size	why not primary use?
urban beekeeping	M-1			any size	why not primary use?
<i>community garden, public</i>					<i>oops, not mentioned in any use tables??</i>
<b>All uses not listed as "by right", "conditional", or "by right, but only as accessory use" are prohibited</b>					
*ZA = Zoning Administrator. A ZA permit is the easiest, least costly type of permit to have to get.					
**CUP = Conditional Use Permit. ZA is one type; PDC (ie getting approval at a Planning & Design Commission hearing) is another (much more costly) type.
